

My husband and I live in an area where it is very difficult to get good radio reception. We depend on XM Radio for news, information and entertainment while we travel. We totally disagree with this bill. Local stations should not have some kind of "lock" on local public news, weather and info anymore than this kind of info should be "locked" for radio versus TV. Public information is public information. If a national newspaper wanted to run a story about something that my local paper was already covering there would be no question of who has the right to publish the information. Get with the 21st century!
